

Sorbitol Content Assay kit

Sorbitol is widely present in animals, plants, microorganisms and cultured cells. It is not only one of the forms of sugar transportation, but also closely related to biological stress resistance and food flavor. Therefore, it is often necessary to detect changes in sorbitol content in sugar metabolism, stress resistance and food research.

Sorbitol forms a blue complex with copper ions in alkaline solution, with a characteristic absorption peak at 655nm wavelength.

Catalog No.	250252
Size	50 Assays / 100 Assays
Product Category	Enzymatic / Metabolic Assay
Detection Method	Visible spectrophotometry
Storage/Stability	2 ~ 8°C/1 year
Shipping	Gel Packs
