

[Des-Leu9]-Kinetensin

Des-Leu-kinetensin, also called histamine-releasing peptide (HRP), was originally isolated from incubates of mammalian albumins with acid proteases, but is also generated by stimulated rat mast cells in the presence of BSA. HRP is able to release histamine from isolated mast cells and to increase cutaneous vascular permeability. Furthermore, the peptide is chemotactic to human and rat neutrophils.

Catalog No.	5991641
Size	
Product Category	Peptide
Sequence	Ile-Ala-Arg-Arg-His-Pro-Tyr-Phe
CAS No.	123496-28-6
Mol. Formula	C50H74N16O10
Mol. Weight	1059.25
Purity	> 95%
MOQ	1 mg
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
