

## Cytochrome P450 2S1 Polyclonal Antibody

|                        |                                                                                                                |
|------------------------|----------------------------------------------------------------------------------------------------------------|
| Catalog No.            | 4073891                                                                                                        |
| Size                   | 30ug / 100ug                                                                                                   |
| Product Category       | Primary Antibody                                                                                               |
| Immunogen              | KLH-conjugated synthetic peptide encompassing a sequence within the center region of human Cytochrome P450 2S1 |
| Clonality              | Polyclonal                                                                                                     |
| Host                   | Rabbit                                                                                                         |
| Reactivity             | Human, Mouse                                                                                                   |
| Application            | WB; IHC; IF/IC                                                                                                 |
| Recommended Dilutions  | WB (1/500 - 1/1000); IHC (1/100 - 1/200); IF/IC (1/100 - 1/500)                                                |
| Purification           | Affinity chromatography method                                                                                 |
| Storage Buffer         | 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol & 0.01% Sodium azide                    |
| Format & Concentration | Liquid; 1mg/ml                                                                                                 |
| UniProt ID             | Q96SQ9                                                                                                         |
| Synonyms               | Cytochrome P450 2S1; CYP11S1                                                                                   |
| Storage/Stability      | -20°C/1 year                                                                                                   |
| Shipping               | Gel Packs                                                                                                      |
