

## Amantadine ELISA kit

---

This kit is based on Enzyme Linked Immunosorbent Assay (ELISA) for the detection of Amantadine residues in various samples. All the necessary reagents alongwith pre-coated (12 x 8) 96-well micro-plate/plates are supplied in the kit.

|                   |                     |
|-------------------|---------------------|
| Catalog No.       | 392052              |
| Size              | 96 Test             |
| Product Category  | Drug Residue ELISA  |
| Sensitivity       | 0.2 ppb             |
| Sample Source     | Chicken, Pork, Duck |
| Storage/Stability | 2 ~ 8°/1 year       |
| Shipping          | Ambient             |
