

Trypsin Digestion solution [0.1%]

Trypsin is used for proteolytic digestion of formalin-fixed paraffin-embedded (FFPE) tissue sections prior to application of antibodies. In IHC most commonly used fixative like formalin; mask tissue antigens (cellular, membrane and nuclear) by cross-linking process, this results in poor or no staining in IHC. Trypsin digestion improves immunoreactivity of some antigens in FFPE tissue sections.

Catalog No.	505032
Size	10mL
Product Category	Immuno Reagent
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
