

## SA (Sialic Acid) ELISA kit

---

This kit applies competitive inhibition ELISA method for the quantitative detection of SA (Sialic Acid) in various species samples. The microtiter plate provided in this kit has been pre-coated with SA protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to SA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$ 10nm. The concentration of SA in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3000424
Size	96-Wells
Product Category	ELISA (Quantitative)
Reactivity	Various
Sample	Serum; Plasma; Tissue Homogenates; Other Biological Fluids
Assay Method	Competitive Inhibition ELISA
Assay Duration	2.5 hours
Sensitivity	26.1 ug/mL
Standard Curve Range	78.13-5000 ug/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
