

## Equine AMH (Anti-Mullerian Hormone) ELISA kit

---

This kit applies competitive inhibition ELISA method for the quantitative detection of AMH (Anti-Mullerian Hormone) in equine samples. The microtiter plate provided in this kit has been pre-coated with Horse AMH protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Horse AMH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$ 10nm. The concentration of Horse AMH in the samples is then determined by comparing the OD of the samples to the standard curve.

|----------------------|---|
| Catalog No.          | 3169556   |
| Size                 | 96-Wells  |
| Product Category     | ELISA (Quantitative)  |
| Reactivity           | Equine  |
| Sample               | Serum; Plasma; Tissue Homogenates; Cell Lysates; Cell Culture Supernates; Other Biological Fluids |
| Assay Method         | Competitive Inhibition ELISA  |
| Assay Duration       | 2 hours   |
| Sensitivity          | 133.8 pg/mL   |
| Standard Curve Range | 468.75-30000 pg/mL  |
| Storage/Stability    | -20°C/1 year; 4°C/6 months  |
