

## Guinea Pig GT (Gastrin) ELISA kit

---

This kit applies competitive inhibition ELISA method for the quantitative detection of GT (Gastrin) in guinea pig samples. The microtiter plate provided in this kit has been pre-coated with Guinea pig GT protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Guinea pig GT. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$ 10nm. The concentration of Guinea pig GT in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3197129
Size	96-Wells
Product Category	ELISA (Quantitative)
Reactivity	Guinea pig
Sample	Serum; Plasma; Other Biological Fluids
Assay Method	Competitive Inhibition ELISA
Assay Duration	2 hours
Sensitivity	4.35 pg/mL
Standard Curve Range	15.63-1000 pg/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
