

Human DcR3 (Decoy receptor 3) ELISA kit

This kit applies sandwich ELISA method for the quantitative detection of DcR3 (Decoy receptor 3) in human samples. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human DcR3. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human DcR3. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human DcR3, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Human DcR3 in the samples is then determined by comparing the OD of the samples to the standard curve.

|----------------------|--|
| Catalog No. | 3019819 |
| Size | 96-Wells |
| Product Category | ELISA (Quantitative) |
| Reactivity | Human |
| Sample | Serum; Plasma; Other Biological Fluids |
| Assay Method | Sandwich ELISA |
| Assay Duration | 3.5 hours |
| Sensitivity | 24.9 pg/mL |
| Standard Curve Range | 62.5-4000 pg/mL |
| Storage/Stability | -20°C/1 year; 4°C/6 months |
