

## Mouse PGD2 (Prostaglandin D2) ELISA kit

---

This kit applies competitive inhibition ELISA method for the quantitative detection of PGD2 (Prostaglandin D2) in mouse samples. The microtiter plate provided in this kit has been pre-coated with Mouse PGD2 protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse PGD2. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$ 10nm. The concentration of Mouse PGD2 in the samples is then determined by comparing the OD of the samples to the standard curve.

| Catalog No.          | 3028759                                |
| Size                 | 96-Wells                               |
| Product Category     | ELISA (Quantitative)                   |
| Reactivity           | Mouse                                  |
| Sample               | Serum; Plasma; Other Biological Fluids |
| Assay Method         | Competitive Inhibition ELISA           |
| Assay Duration       | 2 hours                                |
| Sensitivity          | 4.34 pg/mL                             |
| Standard Curve Range | 15.63-1000 pg/mL                       |
| Storage/Stability    | -20°C/1 year; 4°C/6 months             |
