

## Mouse TGFbR2 (Transforming Growth Factor beta Receptor II) ELISA kit

---

This kit applies sandwich ELISA method for the quantitative detection of TGFbR2 (Transforming Growth Factor beta Receptor II) in mouse samples. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse TGFbR2. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse TGFbR2. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse TGFbR2, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$ 10nm. The concentration of Mouse TGFbR2 in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3026823
Size	96-Wells
Product Category	ELISA (Quantitative)
Reactivity	Mouse
Sample	Serum; Plasma; Tissue Homogenates; Other Biological Fluids
Assay Method	Sandwich ELISA
Assay Duration	3.5 hours
Sensitivity	0.112 ng/mL
Standard Curve Range	0.32-20 ng/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
