

Porcine PGD2S (Prostaglandin D2 Synthase, Brain) ELISA kit

This kit applies sandwich ELISA method for the quantitative detection of PGD2S (Prostaglandin D2 Synthase, Brain) in porcine samples. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Pig PGD2S. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Pig PGD2S. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Pig PGD2S, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Pig PGD2S in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3219426
Size	96-Wells
Product Category	ELISA (Quantitative)
Reactivity	Porcine
Sample	Serum; Plasma; Cerebrospinal Fluid; Other Biological Fluids
Assay Method	Sandwich ELISA
Assay Duration	3.5 hours
Sensitivity	0.129 ng/mL
Standard Curve Range	0.32-20 ng/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
