

## Porcine TM (Thrombomodulin) ELISA kit

---

This kit applies sandwich ELISA method for the quantitative detection of TM (Thrombomodulin) in porcine samples. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Pig TM. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Pig TM. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Pig TM, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$ 10nm. The concentration of Pig TM in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3215710
Size	96-Wells
Product Category	ELISA (Quantitative)
Reactivity	Porcine
Sample	Plasma
Assay Method	Sandwich ELISA
Assay Duration	3.5 hours
Sensitivity	0.29 ng/mL
Standard Curve Range	0.79-50 ng/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
