

## Rabbit ALB (Albumin) ELISA kit

---

This kit applies competitive inhibition ELISA method for the quantitative detection of ALB (Albumin) in rabbit samples. The microtiter plate provided in this kit has been pre-coated with Rabbit ALB protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rabbit ALB. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$ 10nm. The concentration of Rabbit ALB in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3221292
Size	96-Wells
Product Category	ELISA (Quantitative)
Reactivity	Rabbit
Sample	Serum; Plasma; Other Biological Fluids
Assay Method	Competitive Inhibition ELISA
Assay Duration	2 hours
Sensitivity	245.5 ng/mL
Standard Curve Range	781.25-50000 ng/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
