

Rabbit P1NP (Procollagen 1 N-Terminal Propeptide) ELISA kit

This kit applies competitive inhibition ELISA method for the quantitative detection of P1NP (Procollagen 1 N-Terminal Propeptide) in rabbit samples. The microtiter plate provided in this kit has been pre-coated with Rabbit P1NP protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rabbit P1NP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Rabbit P1NP in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3228438
Size	96-Wells
Product Category	ELISA (Quantitative)
Reactivity	Rabbit
Sample	Serum; Plasma; Tissue Homogenates; Cell Lysates; Cell Culture Supernates; Other Biological Fluids
Assay Method	Competitive Inhibition ELISA
Assay Duration	2 hours
Sensitivity	0.127 ng/mL
Standard Curve Range	0.32-20 ng/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
