

## Rat PC (Protein Carbonyl) ELISA kit

---

This kit applies sandwich ELISA method for the quantitative detection of PC (Protein Carbonyl) in rat samples. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat PC. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat PC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat PC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$ 10nm. The concentration of Rat PC in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3039078
Size	96-Wells
Product Category	ELISA (Quantitative)
Reactivity	Rat
Sample	Serum; Cell Lysate; Hep Plasma; EDTA Plasma; Tissue Lysate
Assay Method	Sandwich ELISA
Assay Duration	3.5 hours
Sensitivity	0.114 nmol/mL
Standard Curve Range	0.32-20 nmol/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
