

T4 DNA Ligase [400U/uL]

T4 DNA Ligase catalyzes the formation of phosphodiester bonds between adjacent 5'-phosphate and 3'-hydroxyl ends of double-stranded DNA or RNA. The enzyme not only catalyzes the ligation of blunt or sticky ends, but also repairs single-stranded nicks in double-stranded DNA, RNA, or DNA/RNA hybrid duplexes.

Kit components:

1. T4 DNA Ligase: 20 μ L (8kU)
2. 10x T4 DNA Ligase Buffer: 100 μ L

Catalog No.	515010
Size	8kU
Product Category	Cloning / Ligation
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
