

## Malondialdehyde (MDA) Rapid ELISA kit

---

This Rapid ELISA kit applies Competitive Inhibition enzyme immunoassay technique for the quantitative detection. The micro ELISA plate provided in this kit has been pre-coated with Malondialdehyde (MDA) protein. Standards or samples are added to the appropriate micro ELISA plate wells then with a biotin-conjugated antibody specific to Malondialdehyde (MDA) . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Malondialdehyde (MDA) in the samples is then determined by comparing the OD of the samples to the standard curve.

Catalog No.	3510165
Size	96-Well Tests
Product Category	Rapid ELISA
Reactivity	Various
Sample	Serum; Plasma; Other Biological Fluids
Assay Method	Competitive Inhibition ELISA
Assay Duration	45 min
Sensitivity	9.15 ng/mL
Standard Curve Range	31.25-2000 ng/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
