

## Mouse Prostaglandin F2 alpha (PGF2alpha) Rapid ELISA kit

---

This Rapid ELISA kit applies Competitive Inhibition enzyme immunoassay technique for the quantitative detection. The micro ELISA plate provided in this kit has been pre-coated with Mouse PGF2alpha-. During the reaction, Mouse PGF2alpha-in the sample or standard competes with a fixed amount of Mouse PGF2alpha-on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Mouse PGF2alpha-. Excess conjugate and unbound sample or standard are washed away, and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns from blue to yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm  $\pm$  2 nm. The concentration of Mouse PGF2alpha-in tested samples can be calculated by comparing the OD of the samples to the standard curve.
