

DAB substrate kit [20x]

The kit contains Diaminobenzidine (DAB) substrate and Peroxidase (HRP) enzyme for the staining to detect the target molecule. The HRP catalyzes the reaction of the DAB substrate, producing a brown color precipitate at the reaction site.

1) Solution-A: 3mL/10mL

2) Solution-B: 3mL/10mL

Catalog No.	504103
Size	3mL / 10mL
Product Category	Western Blot Substrate
Storage/Stability	-20°C / 1 year
Shipping	Gel Packs
