

REAL-Prep™ Streptavidin Beads Box

The Streptavidin-Biotin (SA-Biotin) system exhibits exceptional binding affinity ($K_d = 10^{-15}$), making it widely applicable in biological research and diagnostics. REAL-Prep™ Streptavidin Beads utilize protein coupling technology to covalently immobilize streptavidin on solid-phase carriers, enabling efficient binding of biotinylated antibodies, nucleic acids, proteins, and other ligands.

Catalog No.	518100
Size	
Product Category	Next-Generation Sequencing
Pack Size	8 rxn / 16 rxn / 96 rxn
Storage/Stability	-20° C/ 6 months
Shipping	Gel Packs
