

## dCas9-NLS

---

The dCas9-NLS protein is a DNA-cleavage-deficient mutant of the *Streptococcus pyogenes* Cas9 protein (D10A, H840A), expressed recombinantly in *Escherichia coli*. An NLS signal peptide is added to the protein's C-terminus. Cas9-NLS can stably bind to the guide RNA (gRNA) and target the DNA.

Catalog No.	519201
Size	
Product Category	Isothermal Amplification
Pack Size	50ug 100ug 500ug
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
