

## High Yield crRNA/sgRNA Synthesis Kit

---

The CRISPR guide RNA (gRNA) transcription kit contains T7 RNA Polymerase Mix, enabling efficient transcription and synthesis of gRNA from small amounts of sample (suitable for gRNA preparation for Cas12a, Cas13a, Cas12b, and Cas9). A single reaction with 0.5µg of control template can yield up to 100µg of gRNA.

Catalog No.	519262
Size	
Product Category	Isothermal Amplification
Pack Size	48 rxns
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
