

GranuloSep GSM 1119

GranuloSep GSM 1119 is a solution of polysucrose and sodium diatrizoate, adjusted to a density of $1.119 \pm 0.0010\text{g/mL}$. It separates mononuclear cells and granulocytes from defibrinated EDTA or heparin treated human blood while it is combined with Lymphocyte Separation Medium [1.077] (LSM1077).

Catalog No.	522005
Size	100mL
Product Category	Cell Separation
