

Chymotrypsin Activity Assay kit

Chymotrypsin, also known as chymotrypsin, is a proteolytic enzyme secreted by the pancreas, which can quickly decompose denatured proteins. The function of chymotrypsin and trypsin is similar, but has the advantages of strong decomposition ability, low toxicity and small adverse reactions. Clinically, chymotrypsin is used for sputum thinning, for purulent and non-purulent sputum is effective; it is also used for wound healing after trauma or surgery, such as cataract removal.

Chymotrypsin catalyzes the hydrolysis of BTEE, and the product has characteristic light absorption at 256nm; chymotrypsin can be calculated by measuring the increase rate of light absorption at 256nm.

Catalog No.	250233
Size	50 Assays / 100 Assays
Product Category	Colorimetric Assay
Detection Method	UV spectrophotometry
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
