

NADP Phosphatase Activity Assay kit

NADPase mainly exists in plant tissues and is the only one that catalyzes NADP in organisms. Enzymes that degrade into NAD⁺, together with NADK, regulate NAD. The balance between NADP and NADPase can catalyze NADP⁺, hydrolysis to the reaction of NAD⁺ and inorganic phosphorus. NADPase activity is determined by measuring the amount of inorganic phosphorus.

Catalog No.	250111
Size	50 Assays / 100 Assays
Product Category	Colorimetric Assay
Detection Method	Visible spectrophotometry
Storage/Stability	2 ~ 8°C/1 year
Shipping	Gel Packs
