

Nitric Oxide Content Assay kit

Nitric Oxide (NO) is an extremely unstable biological free radical with small molecules and simple structure. It is a gas at room temperature and slightly soluble in water. It is fat-soluble and can quickly diffuse through biological membranes. As a new type of biological messenger molecule, it plays a role in transmitting signals between and within cells. It is widely distributed in various tissues in the body, especially in nerve tissues. It also occurs in the body's nervous, circulatory, respiratory, digestive, genitourinary and other systems.

Catalog No.	250147
Size	50 Assays / 100 Assays
Product Category	Colorimetric Assay
Detection Method	Visible spectrophotometry
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
