

ABTS

ABTS is used as a substrate in various bioassays to measure peroxidase activity, antioxidant capacity, and for immunodiagnosics, particularly in ELISA. The enzyme-catalyzed reaction with ABTS generates a blue-green radical cation that can be measured spectrophotometrically, making it a sensitive and stable chromogenic substrate for detecting horse radish peroxidase (HRP).

Catalog No.	505101
Size	100mL
Product Category	Immunodetection Reagent
Storage/Stability	2 ~ 8°C / 1 year
Shipping	Ambient
