

AEC

AEC (3-Amino-9-ethylcarbazole) is a chromogenic substrate for horseradish peroxidase (HRP), used in immunochemical assays like immunohistochemistry and immunoblotting to produce a red-colored product. It's a popular choice because it yields a bright, visible red stain that is stable and works well with an aqueous counterstain and mounting medium

Catalog No.	505102
Size	3 x 1mL
Product Category	Immunodetection Reagent
Storage/Stability	2 ~ 8°C / 1 year
Shipping	Ambient
