

Tissue Freezing Medium

Tissue Freezing Medium is an embedding matrix for frozen sections. It is a formulation of water-soluble glycols and resins that provides a solid bond. The tissue freezing medium is highly viscous and water soluble, making it an excellent choice for supporting tissue during cryotomy. Available in a 125 mL dropper bottle.

Catalog No.	506009
Size	120mL
Product Category	Immunoreagent
Storage/Stability	Ambient/1 year
Shipping	Ambient
