

Mounting Medium, Antifading

Antifading Mounting Medium is a glycerol based anti-fluorescence attenuating sealing liquid. The anti-fluorescent attenuator is added, which has a strong anti-fluorescence attenuation effect for the mounting of fluorescent tissue and cell samples. It is commonly used for slowing down the fluorescence decay. After the film is sealed, the sample can be stored for 2-3 weeks at 4°C or -20°C in the dark.

The Medium is easy to operate; when the film is sealed, a drop of mounting medium is dispensed and the cover glass can be covered.

Catalog No.	506301
Size	5mL / 25mL
Product Category	Immunoreagent
Storage/Stability	2 ~ 8°C/1 year
Shipping	Ambient
