

Dewaxing Solution

Dewaxing solution is an environmentally safe, non-toxic, slightly colorless and transparent liquid with natural plant fragrance. It can be used for microscopic preparation of plant, animal and human anatomy. It is insoluble in water and has good volatility. It becomes brittle and can enhance the effect of waxing, but it is conducive to slicing; it is mainly composed of oil extracted from natural plants, fruit oil and active agent, etc. It is synthesized by special process formula and does not contain volatile toxic substances such as xylene. It is specially used for pathological tissues. Learning, cytological sample processing, good solubility of alcohol and paraffin, is an ideal substitute for transparent treatment of xylene in biological tissues, and has excellent transparency. It is not mixed with water vapor, even in humid environments. It will not decrease in concentration due to absorption of water vapor; it will not deteriorate and can be stored for a long time. It can fundamentally change the environmental conditions of the tablet to avoid benzene poisoning and protect the health of the producer.

Catalog No.	506305
Size	500mL
Product Category	Immunoreagent
Storage/Stability	Ambient/3 years
Shipping	Ambient
