

ABTS

Catalog No.	505001
Size	1g
Product Category	Immuno Substrate
Storage/Stability	ABTS is used as a substrate in various bioassays to measure peroxidase activity, antioxidant capacity, and for immunodiagnosics, particularly in ELISA. The enzyme-catalyzed reaction with ABTS generates a blue-green radical cation that can be measured spectrophotometrically, making it a sensitive and stable chromogenic substrate for detecting horse radish peroxidase (HRP).
Shipping	2 ~ 8°C / 1 year
