

## Human CEACAM8 (Carcinoembryonic Antigen Related Cell Adhesion Molecule 8) ELISA Kit

|                   |                                                                                                                |
|-------------------|----------------------------------------------------------------------------------------------------------------|
| Catalog No.       | 3038790                                                                                                        |
| Size              | 96 Tests                                                                                                       |
| Product Category  | ELISA (Quantitative)                                                                                           |
| Reactivity        | Human                                                                                                          |
| Sample Type       | Serum, Plasma, Tissue homogenates & other biological fluids                                                    |
| Assay Method      | Sandwich                                                                                                       |
| Assay Duration    | 3.5 hours                                                                                                      |
| Sensitivity       | 6 pg/mL                                                                                                        |
| Standard          | 1000 pg/mL                                                                                                     |
| Detection Range   | 15.63-1000 pg/mL                                                                                               |
| Synonyms          | CD67; CD66-B; CD66b; CGM6; NCA95; Carcinoembryonic antigen<br>CGM6; Non-specific cross-reacting antigen NCA-95 |
| Storage/Stability | -20°C/1 year; 4°C/6 months                                                                                     |
