

## Canine MCP2 (Monocyte Chemotactic Protein 2) ELISA Kit

|                   |                                                                                                                                                          |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Catalog No.       | 3072737                                                                                                                                                  |
| Size              | 96 Tests                                                                                                                                                 |
| Product Category  | ELISA (Quantitative)                                                                                                                                     |
| Reactivity        | Canine                                                                                                                                                   |
| Sample Type       | Serum, Plasma, Tissue homogenates & other biological fluids                                                                                              |
| Assay Method      | Sandwich                                                                                                                                                 |
| Assay Duration    | 3.5 hours                                                                                                                                                |
| Sensitivity       | 12.1 pg/mL                                                                                                                                               |
| Standard          | 2000 pg/mL                                                                                                                                               |
| Detection Range   | 31.25-2000 pg/mL                                                                                                                                         |
| Synonyms          | CCL8; CCL-8; SCYA8; MCP-2; HC14; Chemokine C-C-Motif Ligand 8; Small Inducible Cytokine Subfamily A(Cys-Cys)Member 8; Monocyte Chemoattractant Protein 2 |
| Storage/Stability | -20°C/1 year; 4°C/6 months                                                                                                                               |
