

## Canine SP (Substance P) ELISA Kit

|                   |                                                                                                    |
|-------------------|----------------------------------------------------------------------------------------------------|
| Catalog No.       | 3062977                                                                                            |
| Size              | 96 Tests                                                                                           |
| Product Category  | ELISA (Quantitative)                                                                               |
| Reactivity        | Canine                                                                                             |
| Sample Type       | Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates & other biological fluids |
| Assay Method      | Sandwich                                                                                           |
| Assay Duration    | 3.5 hours                                                                                          |
| Sensitivity       | 4.98 pg/mL                                                                                         |
| Standard          | 1000 pg/mL                                                                                         |
| Detection Range   | 15.63-1000 pg/mL                                                                                   |
| Synonyms          | Substance P                                                                                        |
| Storage/Stability | -20°C/1 year; 4°C/6 months                                                                         |
