

Ham's F-10 w/ Phenol Red & HEPES

Ham's F-10 (or F-10) is a nutrient mixture used for cell culture, serum-free growth of Chinese Hamster Ovary (CHO) cells. It is widely used for a variety of demanding mammalian cell types and is available in different formulations. It contains a wide variety of components to support cell growth, including: amino acids, vitamins, inorganic salts and other ingredients. It can be formulated with L-glutamine, HEPES buffer, sodium bicarbonate, and phenol red.

*All cell culture media & supplements are available in standard pack size of 500mL (liquid) and 10 x 1L (powder sachets). Bulk packing in powder form is also available on request.

Catalog No.	588105
Size	500mL / 10 x 1L
Product Category	Cell Culture Media
With	Phenol Red & HEPES
Without	L-Glutamine & Sodium Pyruvate
Storage/Stability	2 ~ 8°C/1 year
Shipping	Gel Packs
