

DAB substrate kit [20x]

The kit contains Diaminobenzidine (DAB) substrate and Peroxidase (HRP) enzyme for the staining to detect the target molecule. The HRP catalyzes the reaction of the DAB substrate, producing a brown color precipitate at the reaction site.

Catalog No.	505005
Size	2 x 3mL / 2 x 10mL
Product Category	Immuno Detection
Storage/Stability	-20°C / 1 year
Shipping	Gel Packs
