

Ascorbic Acid Oxidase Activity Assay kit

Ascorbic Acid Oxidase is a glycoprotein located in the cell wall of plants, belonging to the "blue copper oxidase" family. Ascorbic acid and AAO in the cell wall are closely related to cell wall metabolism and growth. The MDHA formed by the oxidation of AsA by AAO can be reduced by cytochrome b on the plasma membrane. In this process, the transport of electrons across the membrane can promote cell growth.

AAO can directly oxidize AsA, and AAO activity can be calculated by measuring the oxidation amount of AsA.

Catalog No.	250126
Size	50 Assays / 100 Assays
Product Category	Colorimetric Assay
Detection Method	Spectrophotometry / Micro-Plate Reader
Storage/Stability	2-8°C/1 year
Shipping	Gel Packs
