

Sialic Acid Content Assay kit

Sialic acid (SA), also known as N-acetylneuraminic acid, is an important component of glycoproteins and glycolipids on the cell membrane. It widely exists in organisms and participates in various physiological functions on the cell surface. Sialic acid forms a purplish red complex with 5-methylresorcinol in the presence of oxidant. It has a maximum absorption peak at 560nm. The content of sialic acid can be calculated by measuring the light absorption value of the product at 560nm

Catalog No.	250536
Size	50 Assays / 100 Assays
Product Category	Colorimetric Assay
Storage/Stability	-20°C/6 months
Shipping	Gel Packs
