

Sorbitol Dehydrogenase Activity Assay kit

SDH (EC 1.1.1.14) catalyzes the dehydrogenation of sorbitol to form fructose, which is one of the key enzymes that regulate the content of sorbitol in organisms.

SDH catalyzes the dehydrogenation of sorbitol to produce fructose, and at the same time reduces NAD⁺ to produce NADH. SDH activity can be calculated by measuring the increase rate of absorbance at 340nm.

Catalog No.	250253
Size	50 Assays / 100 Assays
Product Category	Colorimetric Assay
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
