

2x HS SYBR Green qPCR Mix [w/ Rox]

2x HS SYBR Green qPCR Mix [w/ Rox] is a special premix for qPCR detection using SYBR Green I chimeric fluorescence method. The Mix contains all components for qPCR, except DNA templates and primers. It reduces the reaction set-up time and risk of contaminations.

The core component is the chemically modified hot-start Taq DNA polymerase. With the optimized buffer, the Mix suppresses non-specific amplifications well to obtain consistent and reliable qPCR results in a broad template concentration range.

Catalog No.	511002
Size	1mL
Product Category	PCR / qPCR / RT-PCR
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
