

Resazurin solution

Resazurin solution is a ready-to-use redox indicator that is used in assays for cell viability, metabolic activity, and proliferation. The solution is blue when oxidized and converts to a highly fluorescent pink/red form (resorufin) when reduced by metabolic activity, allowing for detection through fluorescence or absorbance measurements.

Catalog No.	520023
Size	500mL
Product Category	Cell Detection
Storage/Stability	2 ~ 8°C/3 years
Shipping	Ambient
