Quick-Blu Gel Stain

Quick-Blu Gel Stain is a fast-sensing, ready-to-use protein gel stain based on Coomassie for the SDS-PAGE or nondenaturing electrophoresis gels. The stain can detect as little as 4ng of protein within a short period of time, in less than 30 minutes. The stain provides background free resulting in high band visibility. The gels require no destaining, simply rinsing with the tap water.

Catalog No.	502203
Size	500mL
Product Category	SDS-PAGE Electrophoresis
Storage/Stability	2 ~ 8°C/1 year
Shipping	Ambient
