

RNA stabilizer [RNAlater / RNAstab / RNAwait]

RNA stabilizer is a non-toxic and ready-to-use sample storage solution, which can separate intracellular RNA from RNase, and can quickly and reliably preserve animal tissue and intracellular RNA. Immediately after the tissue is obtained, it can be immersed in RNAwait preservation solution and then it can be stored for 7 days at room temperature, 4 weeks at 4°C, and long-term storage at -20°C and -80°C. The RNA remains stable and does not degrade.

Catalog No.	140010
Size	100mL / 250mL
Product Category	Nucleic Acid Isolation
Storage/Stability	Ambient/2 years
Shipping	Ambient
