

Modified Tyrode's solution

Modified Tyrode's Balanced Salt Solution (BSS) is consistent with the pH value, osmotic pressure and other environmental conditions in the cell growth state, and has the functions of maintaining osmotic pressure, controlling acid-base balance, and supplying energy and inorganic salt components necessary for cell survival and metabolism. It can meet the basic needs of cell survival and maintenance of certain metabolism in in vitro experiments. Modified Tyrode's solution is also a kind of balanced salt solution, mainly composed of sodium chloride, phosphate, calcium chloride, glucose, etc., HEPES.
