

Gentamcin [10mg/mL]

Gentamicin is a water-soluble aminoglycoside. Gentamicin solution at a concentration of 10mg/mL is a broad-spectrum antibiotic used in cell culture to prevent bacterial contamination. It is effective against contaminations with gram-positive and gram-negative bacteria.

Catalog No.	155003
Size	20mL
Product Category	Stock Solution / Buffer
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
