

Dehydroascorbate Reductase Activity Assay kit

Dehydroascorbate reductase activity determination test kit determination significance: DHAR catalyzes GSH to reduce DHA to produce AsA, regulates the ratio of cellular AsA/DHA, and is a key enzyme in the ascorbic acid-glutathione redox cycle.

DHAR catalyzes GSH to reduce DHA to AsA. DHAR activity can be calculated by measuring the amount of DHA reduced.

Catalog No.	250066
Size	50 Assays / 100 Assays
Product Category	Colorimetric Assay
Detection Method	Spectrophotometry / Micro-Plate Reader
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
