RT-LAMP Isothermal Amplification kit (RNaseH2 probe-based)

This product introduces RNaseH2 enzyme in RT-LAMP reaction system, which greatly increase the specificity.

The kit contains Bst DNA polymerase, reverse transcripase, RNaseH2 endonuclease, reaction buffer, and positive control. It can be used for SNP detection.

Catalog No.	518303
Size	96 rxns
Product Category	Isothermal Amplification
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
