

## REAL-Prep™ Stubby Adapter & UDI Primer Set [10nt] 1~96 (for Illumina)

---

UDI Primers are a mix of i5 and i7 Primers. UDI Primers and Stubby adapter together are the dedicated linker for library construction on the Illumina high-throughput sequencing platform. REAL-Prep™ Stubby Adapter & UDI Primer set are available in piercable plate, each well of the plate contain a unique dual indexing primer pair with PE adapter.

All reagents provided in the kit undergo rigorous quality control and functional verification to maximize library construction stability and repeatability.
